

Arizona Report of Public Agency Performance on Graduation Rates for Students with Disabilities

Indicator 1: Graduation Rate

Percent of youth with IEPs graduating from high school with a regular diploma compared to percent of all youth in the State graduating with a regular diploma.

Measurement

The 4-year cohort methodology includes all students with disabilities who entered an Arizona high school at any grade over the previous four school years minus any student who exited due to illness; transferred to a school that is not an Arizona public school; left to be home schooled; transferred to a correctional or detention facility; or deceased during that same time period. Data are extracted from SAIS year-end status codes. Further information regarding the calculation of graduation rates for Arizona can be found on the ADE website at www.ade.az.gov/researchpolicy.

Explanation of Indicator

The data reported below indicates the graduation rate for all districts, charter schools, and other education agencies that award high school diplomas. The data indicate the percentage of students with disabilities who graduated within 4 years of entering high school.

Data are reported with an asterisk (*) for a PEA when the PEA had fewer than 10 students with disabilities who were in the 2007 cohort. In these instances, the data are not reported to ensure confidentiality. PEAs that reported no students with disabilities in the 2007 cohort are not listed in this report.

State Target for SY 2006–2007: 63%
